

GG06

LOADER ARTICULATED

The Perkins engine, delivering 25 HP, is the heart of the GG06 loader. It combines high power with fuel efficiency, enabling long, effective operation without concerns about high running costs. Perkins is a brand known for its reliability and durability, making this loader's engine an excellent choice for demanding, heavy-duty tasks.

One of the key parameters that distinguishes the GG06 loader is its lifting height of 2.6 meters. This feature allows the machine to lift and transport loads at significant heights, greatly facilitating tasks on construction sites and other working areas. Additionally, the operating speed of 18 km/h ensures that the GG06 can move quickly across the site, saving time and boosting productivity. Thanks to its compact size — 3325 mm in length, 1155 mm in width, and 2360 mm in height — the GG06 loader is highly maneuverable and easy to operate.

■ Specification

Bucket capacity	0.3 m. ³
Waga maszyny	1470 kg
Engine power	25 HP
Load capacity	600 kg
Engine	Perkins 3-cylinder
Tire size	27*8.5-15TL
Hydraulic Pump	PWG Italy 36L per minute

■ Working Range

Lifting height	2.6 m.
Travel Speed	18 km/h

■ Dimensions

Length	3325 mm
Height	2360 mm
Width	1155 mm

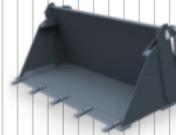

■ Additional equipment (for reference)

Pallet Forks

Hay Forks

4-in-1 Bucket

Snow Plow

Sweeper

Hay Grab
