

GG850C

CRAWLER EXCAVATOR

At the heart of the GG850CAB is the three-cylinder Kubota D722 engine, delivering 15 HP at 3600 rpm. This reliable and fuel-efficient power unit is known for its durability and low fuel consumption, enabling the excavator to handle challenging terrain with ease.

The GG850CAB features a Wanye hydraulic system operating at 16 MPa, ensuring precise control over all boom and attachment functions. Travel and swing motors by Dali support smooth maneuverability, and the full 360° turret rotation allows the operator to perform complex tasks without repositioning the machine. With an overall width of just 930 mm, it easily fits through standard garden gates, narrow paths, and tight areas around buildings. Its total length of 2770 mm and height of 2100 mm allow for easy transport on a small trailer, making it the perfect solution.
