2.5TON 4.5M DIESEL - ROTATOR

The diesel drive, based on the XINCHAI EURO 5 engine with 44.8 kW and 3 cylinders, ensures continuous power with minimal fuel consumption. With a fuel tank capacity of 60 liters, the forklift can operate for extended periods without the need for refueling. Users can rely on true efficiency in all conditions, and a working speed of 17-19 km/h increases the pace of operations.

The forklift with a rotary table allows for easy and precise rotation of loads, which increases versatility and work efficiency. Our forklift with a rotary table, offering a load capacity of 2500 kg and a lifting height of 4.5 meters, is the perfect solution for those who require maximum versatility. One of the key features of this model is the rotary table, which allows the rotation of loads through a full 360-degree range. This solution not only increases work efficiency but also enables precise placement of goods in hard-to-reach areas.

■ Specification

Rotator	Yes
Side Shift Forks	Integrated
Load Capacity	2500 kg
Tire Type	Pneumatic
Brake	Hydraulic Pedal
Engine	XINCHAI EURO 5
Engine Power	44.8 KW
Fuel Tank Capacity	60 L
Weight	3680 kg
Drive	diesel
Mast	triplex
Transmission	Automatic
Battery	12V 80Ah
Number of Cylinders	3
Engine RPM	2400

■ Operating Range

Travel speed	17/19 km/h
Max. Pulling Force	21/15.2 KN
Speed with Load	450/550
Minimum Turning Radius	2240 mm

■ Dimensions

Length	2600 mm
Height	2070 mm
Width	1170 mm
Fork Size	1200mm x 120mm x 40mm
