

3T 3M HYUNDAI

INTERNAL COMBUSTION FORKLIFT

The J30 3T 3M diesel forklift is an extremely efficient and versatile tool that is sure to meet the demands of even the most challenging working environments. Its robust construction, diesel drive, and the Hyundai DM02VB engine with a rated power of 65.26 hp enable smooth and efficient handling of loads up to 3000 kg. With a four-cylinder engine that reaches a maximum speed of 2600 rpm, this forklift guarantees not only power but also reliability in difficult conditions.

The duplex mast, with a lifting height of up to 300 cm, provides great flexibility and enables precise lifting and movement of loads in various warehouse and industrial setups. Combined with an automatic transmission, the forklift reaches a top speed of 19.5 km/h, making it highly efficient for daily operations. Pneumatic tires, with front wheel sizes of 28x9-15-14PR and rear wheels of 6.50-10-10PR, provide excellent traction and a smooth ride in various terrain conditions.
